Style with Substance Fashion & Accessories,

Fatima Tania is a Celebrity Wardrobe Stylist, Image Consultant who was named Outstanding Stylist of 2024. She is known for her dedication and attention to detail. With a love for fashion and an enthusiasm for art, Fashion Styling was her outlet for artistic expression. She has always possessed the innate ability to sense the newest trends before they hit the runway.

From her teens to present, friends and family have complimented on her unique sense of style and sensibility. Her ability to translate runway trends by mixing moderately priced yet quality designer pieces as well as vintage brands has afforded Fatima an edge above the competition (by appealing to fashionable men and women). She works with dozens of the best boutiques, PR companies and designers in both New York and Los Angeles.

Since her start as a stylist Fatima Tan'ia has written and styled for several publications and styled for numerous award shows including the Grammys. In addition to the aforementioned she is the owner of a Property Management company and launching a Podcast named "Power in the Pivot" later this summer.
